# WELCOME

## 11<sup>TH</sup> ANNUAL CONFERENCE ON CRIMES AGAINST WOMEN

On behalf of Dallas Mayor Mike Rawlings, Chief David Brown of the Dallas Police Department, and all of us at Genesis Women's Shelter & Support, it is our honor to welcome you to the **11<sup>th</sup> Annual CONFERENCE ON CRIMES AGAINST WOMEN**. We believe this conference is the most comprehensive convergence of best practices and cutting-edge tools in the fight to end crimes against women.

The conversation surrounding crimes against women in the United States has changed dramatically in the past few years. As recently as the early 1990s, domestic violence was a "family issue", sexual assault only happened to those who were "asking for it", and human trafficking was an unknown concept, something that happened to other women in other countries. In the years since the Violence Against Women Act was first passed in 1994, great strides have been made towards ending crimes against women. Across the nation, laws have been passed, life-changing programs have been implemented, and justice is being served to perpetrators. But, our headlines and news feeds continue to be filled with reports of violence in our homes and assaults on college campuses. We still have critical work to do.

Your presence at this conference sends the message that we are not giving up the fight. You are telling survivors that their stories will not be forgotten. You are letting offenders know that they will answer for their crimes. By working collaboratively, learning from our nation's experts, and utilizing resources in our own neighborhoods, we CAN create communities that provide safety and justice for victims and hold their perpetrators accountable.

Jan Langbein, Chief Executive Officer  
Genesis Women's Shelter & Support

### CONFERENCE PRESENTED BY:

The mission of Genesis Women's Shelter & Support is to provide quality safety and shelter to battered women and their children through crisis intervention and short term crisis therapeutics, and to reduce the occurrence of violence against women and children in the greater Dallas area. Genesis is also committed to raising the level of community awareness regarding the pervasiveness and effects of domestic violence.

24-hour hotline: 214.946.HELP (4357) | Help is free and confidential. | [www.genesisshelter.org](http://www.genesisshelter.org)

The Dallas Police Department is dedicated to protecting all Dallas citizens from crimes through its prevention, patrol, and investigative activities. With respect to the victimization of women, the Department has deployed significant resources to effectively investigate the full range of crimes that are committed against women. While all personnel share the responsibility to combat these crimes, the Department has specialized units that have the primary investigative responsibility for the investigation of domestic violence, protective order violations, stalking, sexual assault, registered sex offenders, trafficking, prostitution, and homicide.

### CONFERENCE MISSION:

To provide a national forum to disseminate the highest level of training, information, and strategies to professionals who are responders and advocates to victims of crimes against women.

## KEYNOTE SPEAKER

### Jackson Katz

Jackson Katz, Ph.D. is an American educator, author, filmmaker, and cultural theorist who is internationally recognized as a pioneer in gender violence prevention education and critical media literacy. In 1993 he co-founded Mentors in Violence Prevention (MVP), one of the most widely implemented and influential sexual and relationship abuse prevention programs in schools, sports culture, and the military in North America and beyond. MVP introduced the “bystander” approach to the gender violence prevention field; Katz is one of the key architects of this now broadly popular approach. He also created the award-winning documentaries *Tough Guise* and *Tough Guise 2* and is the author of *The Macho Paradox: Why Some Men Hurt Women and How All Men Can Help* and *Leading Men: Presidential Campaigns and the Politics of Manhood*. He lectures extensively in the U.S. and around the world on violence, media, and masculinities.

# COMPUTER LABS

**LABS ARE RESTRICTED TO  
LAW ENFORCEMENT AND  
PROSECUTORS**

LABS

## **EXIF DATA & USB INFO**

**Bryan Franke**

This lab will introduce participants to EXIF data that can be found embedded within pictures, as well as provide a software tool and hands on application to view EXIF data. Learn what EXIF data is, what it contains, how to view it, how that data could enhance your investigation, and methods to document this information for the court, judge and jury in an easily understood method.

Ever wonder if someone has uploaded or downloaded information/programs/spyware to or from your computer via a flash drive? Have they connected a "keylogger" to one of your USB ports? When you are executing a search warrant, wouldn't you like to know if the suspect has other storage devices or digital cameras you have not found, or has connected their phone to the computer to download pictures? This session will give participants a software tool and hands on application to find out quickly while still on scene.

## **FIELD SEARCH (3 HR.)**

**Bryan Franke, Jim Tanner**

This lab will provide hands-on training with Field Search, a widely used non-technical tool for conducting triage, consent searches, and compliance monitoring of computers in the field. Each participant will receive a free, fully functional copy of Field Search v 5. Version 5 is the latest significant upgrade to Field Search, released on 1/11/16.

## **TRACING EMAIL COMMUNICATION**

**Bryan Franke**

Participants will learn how to locate, view, and read email header data. You will learn what resources are available to determine what Internet Service Provider (ISP) was used to send the email; how to locate where and how to serve preservation requests and legal process to said ISP; and what some email services do to change the email header data and how that impacts your investigation. Participants will also learn how to geo-locate a general area for the possible suspect before you get the physical address from the ISP. Educating the jury to start seeing these crimes through the correct filter is necessary to turn "weaknesses" into strengths. This workshop will give all relevant players tips on when to use an expert, who to use (and how to find them in your own community), and how to use them to present a case to a jury.
